Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 9-12, 16, 18-21, 23-28 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 9-12 have not been further treated on the merits. Claims 13-15 and 17 are objected to as being dependent upon multiple dependent claims which have been objected to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2, 6, 7 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kalpin.

Regarding claim 2, Kalpin shows a support point on a coupling element that is supported from the oscillating base by supporting elements. These supports are Virtual Pendulums. (Fig. 1)

Regarding claim 6, Kalpin shows a plurality of supporting elements supporting the coupling element which are connected to the base. (Fig. 1)

Regarding claim 7, Kalpin shows the support point for the object is positioned above the plane formed by the plurality of bearing points on the coupling element for the supporting elements. (Fig. 1)

Regarding claim 29, Kalpin discloses a coupling element directly serving as a bearing. (Fig. 1)

Claim 1 is allowed.

Claim 3, 4, 5, 8, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 3 is allowable for the unsupported pendulum/supported pendulum combination required to elevate at one side and lower at the other side. Claim 4 is allowable for the two bearings. Claim 5 is allowable for two connections to the load support. Claim 8 is allowable for the one-axial bearing in the middle of its support element. Claim 22 is allowable for the two hanging pendulums with one standing pendulum.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Medeot et al. discloses a Load dissipating and limiting device. Mori teaches an earthquake-proof foundation. Toyama teaches a support device. Baratoff et al. discloses shock isolators.
